## REASONS FOR ALLOWANCE

1. This is an Examiner's Statement of reasons for Allowance. The closest prior art Barr et al (U.S. Pat. No. 5,182,705) discloses a computerized system/method for managing work in process. A case specific information that is automatically linked with a work source index which includes basic client information.

La, Rue David L discloses a profile editor for creating and editing customer profiles. The customer profiles hold information regarding customers of a call center. Each customer profile encapsulates information regarding call flow of a call serviced by the call center on behalf of the customer.

Gale Group Newsletter discloses a strategy that is offering customers a simple, complete solution for building a solid foundation for their corporation infrastructures. NCD, with its Thininfrastructure model that integrates thin clients, PCs, networks and server farms.

However, neither Barr nor La, Rue David L and Gale Group Newsletter singularly or in combination fail to anticipate or render obvious the recited feature:

As per claim 1, calculating special parameters required for each server farm at each locational site including the steps of:

Recording any newly-added user-types by name; establishing a typing speed involved for each of said newly-added user-types; storing said customer profile data in a configuration session database which operates in conjunction with an application solution delivery configurator program to provide an optimal server farm configuration.
